## Generator Questions And Answers:

Questions and Answers about Electrical Apparatus William Brasher Clayton, James Watt Craig, 1909 *Advances in Open Domain Question Answering* Tomek Strzalkowski, Sanda Harabagiu, 2006-10-07 Automated question answering the ability of a machine to answer questions simple or complex posed in ordinary human language is one of today's most exciting technological developments. It has all the markings of a disruptive technology, one that is poised to displace the existing search methods and establish new standards for user-centered access to information. This book gives a comprehensive and detailed look at the current approaches to automated question answering. The level of presentation is suitable for newcomers to the field as well as for professionals wishing to study this area and/or to build practical QA systems. The book can serve as a how-to handbook for IT practitioners and system developers. It can also be used to teach advanced graduate courses in Computer Science, Information Science, and related disciplines. The readers will acquire in depth practical knowledge of this critical new technology. *Ford Dealer and Service Field*, 1927 Question Answering for the Curated Web Rishiraj Saha Roy, Avishek Anand, 2022-05-31 Question answering QA systems on the Web try to provide crisp answers to information needs posed in natural language replacing the traditional ranked list of documents. QA posing a multitude of research challenges has emerged as one of the most actively investigated topics in information retrieval, natural language processing, and the artificial intelligence communities today. The flip side of such diverse and active interest is that publications are highly fragmented across several venues in the above communities making it very difficult for new entrants to the field to get a good overview of the topic. Through this book we make an attempt towards mitigating the above problem by providing an overview of the state of the art in question answering. We cover the twin paradigms of curated Web sources used in QA tasks: trusted text collections like Wikipedia and objective information distilled into large-scale knowledge bases. We discuss distinct methodologies that have been applied to solve the QA problem in both these paradigms using instantiations of recent systems for illustration. We begin with an overview of the problem setup and evaluation, cover notable sub-topics like open domain multi-hop and conversational QA in depth, and conclude with key insights and emerging topics. We believe that this resource is a valuable contribution towards a unified view on QA helping graduate students and researchers planning to work on this topic in the near future. **Information Retrieval Technology** Yuen-Hsien Tseng, Tetsuya Sakai, Jing Jiang, Lun-Wei Ku, Dae Hoon Park, Jui-Feng Yeh, Liang-Chih Yu, Lung-Hao Lee, Zhi-Hong Chen, 2018-11-16 This book constitutes the refereed proceedings of the 14th Information Retrieval Societies Conference AIRS 2018 held in Taipei, Taiwan, in November 2018.
