

## Chapter 1 The Study of Human Development

### 1. StudySmart: Domains of Development, Nature/Nurture.

There are three Domains of Development and these are as follows: Physical Development, Cognitive Development, and Psychosocial Development. The three major domains can also be called as aspects of development. Nature and nurture can both be major influences for human development.

### 2. Typical major developments in periods of human development.

#### **Prenatal Period (conception to birth)**

Physical Development: Basic body structures and organs form; brain growth spurt begins.

Cognitive Development: Abilities to learn and remember and to respond to sensory stimuli are developing.

Psychosocial Development: Fetus responds to mother's voice and develops a preference for it.

#### **Infancy and Toddlerhood (birth to age 3)**

Physical Development: The brain grows in complexity and is highly sensitive to environmental influence; Physical growth and development of motor skills are rapid.

Cognitive Development: Abilities to learn and remember are present, even in early weeks.

Psychosocial Development: Self-awareness develops; Shift from dependence toward autonomy occurs.

#### **Early Childhood (ages 3 to 6)**

Physical Development: Growth is steady; appearance becomes more slender and proportions more adultlike.
