China and US Foreign Investment Laws and Practices Liu Ziyu, 2024-11-08. The book is a comparative study of the national security review of foreign investment laws in China and the US. The author establishes a theoretical framework to explain the dominant role of ideas on national security and foreign investment rooted in China and the US as well as the oriented role of China-US investment interaction. She concludes that it is difficult for China and the US to reach a consensus on national security review due to their different internal ideas on national security and foreign investment. By comparing the similarities and differences in the development of national security review in China and the US she also proposes a feasible approach to facilitate bilateral investment practices. The book will attract scholars of international economic law, investment law, and Sino-US relations.
