Application of web service technologies on a b2b communication platform by means of a pattern and UML based software development process Arnd Schnieders, 2003-10-02 Diploma Thesis from the year 2003 in the subject Computer Science Software grade 1 0 A Technical University of Berlin Computer Science Open Communication Systems language English abstract There are about 230 000 establishments in the Spanish hotel restaurant and catering industry accounting for a turnover of about 15 6 thousand million euros All of them sell food to private consumers On the other hand suppliers and traders supply the catering trade with food and beverage products Usually the different players in this food distribution network trade products by means of orders which are placed manually This is a process which can be enhanced through the application of computer and Internet technology A project lately also supported by the Spanish government is supposed to fill this gap This project is called Catanet and has been established three years ago Actually the Catanet platform is used by more than 100 customers amongst them very important industry players like Lauren Films Pepsi Unilever and Nestle Some of them will carry out a significant part of their overall food orders by the Catanet platform which corresponds to a turnover volume of many million euros In the former version of the Catanet platform clients had to apply a web page based interface in order to use the Catanet services As this approach prohibited the full exploitation of the benefits the use of computer assistance provides e g human participation still constitutes an inevitable and crucial part of the transaction the interaction is completely

asynchronous an additional level is being added to the Catanet platform eliminating these shortcomings During the time of this work the number of Catanet customers has grown explosively increasing also the diversity of the customer s computer systems Additionally new subprojects could be launched due to the acquisition of a government grant These encompassed among others new value added services demanded by the customers like an instant messaging module and a module for the automatic update of the local product catalog The characteristics of the IT infrastructure of the new customers which will carry out transactions with a serious turnover via the Catanet platform and the necessity to integrate the new subprojects required an adaptation of the design of the platform prototype which had been developed by this time and which is described in this work      *Developing Web Services with Apache Axis* Kent Ka Iok Tong,2006-04-01 If you d like to learn how to create web services in particular using Apache Axis and make some sense of various standards like SOAP WSDL JAX RPC SOAP with attachments WS Security XML Encryption and XML Signature then this book is for you It has a tutorial style that walks you through in a step by step manner to create working code The first 40 pages are freely available on <http://agileskills2.org> DWSAA You can judge it yourself      **OCA Java SE 7 Programmer I Study Guide (Exam 1Z0-803)** Edward G. Finegan,Robert Liguori,2012-10-09 The definitive Oracle Press guide to the latest release of this entry level certification for Java programmersnow an Oracle Certified Associate exam      **Practical J2EE Application Architecture** Nadir Gulzar,2003 Provides developers with a complete roadmap for building large scale J2EE applications You will get a cohesive approach for producing optimal solutions through rigorous life cycle management techniques from inception through deployment Includes sample Web site hosted by the authors that features real world demonstrations of all the book s concepts      **JAVA Developer's Journal** ,2003
