Preach the Word Myles MacBean,2019-11-11 How should we help equip the church leaders of Africa today There remains a well documented lack of theologically sound Bible centric preaching in Sub Saharan Africa The majority of sermons are preached by untrained or undertrained church leaders Following a practical theology praxis this book develops a conceptual framework for the evaluation of existing alternative approaches to grassroots preacher training It also proposes broad principles for effective preacher training and offers a practical solution The 20th century had seen the Christian church in Africa grow 36 fold to 360 million This amazing growth is arguably the largest religious change in human history in such a short period It has shifted the focus of Christianity from North to South This rapid growth is debatably considered by some missiologists and theologians to have resulted in an African church a mile wide and an inch deep That is a church of great size but lacking in spiritual depth The rapid growth has led to insufficient numbers of trained leaders being available to oversee their congregations Most leaders are unpaid Untrained or undertrained leaders have an inadequate knowledge of scripture and lack understanding of its interpretation They also lack the skills they need to communicate its truths Even so they preach up to 90% of the sermons in rural Africa Despite a tremendous hunger for training among many of those preachers traditional college based theological education cannot keep up with the demand for trained pastors and preachers in an affordable or culturally appropriate manner **Perspectives on Assessment and Evaluation in International Schools** Jeff Thompson,Mary Hayden,2018-07-30 Assessment and evaluation are two concepts at the core of schooling which are also central to other forms of education worldwide In an international context assessment and evaluation data are increasingly widely used for accountability and quality assurance purposes at individual student institutional national and global levels This book does not attempt to include consideration of all the issues that could possibly be covered in a title that addresses assessment and evaluation in education internationally Nor has it set out to cover the myriad technical issues with

which assessment and evaluation are inevitably concerned Rather a number of authors working within different contexts of international education whether as teachers or leaders in international schools administrators in international examination bodies or researchers in international educational research organisations have been invited to share ideas arising from their own experiences of what might be interpreted as assessment or evaluation be that assessment of student achievement evaluation of teacher effectiveness or evaluation of school quality The international dimension presents a range of challenges to those with responsibility for implementing assessment and evaluation strategies in widely diverse linguistic cultural social and personal contexts and in this book valuable contributions are shared by colleagues who are authorities in the field It is their personal views on assessment and evaluation derived from professional practice in the international sphere that have been brought together here **Sustainability, AI and Innovation: Proceedings of the Applied Research in Humanities & Social Sciences (ARHSS 2023)** Hamid M. K. Al Naimiy,Maamar Bettayeb,Fakir Al Gharaibeh,Hussein M. Elmehdi,Ihsan A.
