

Introduction

This manual covers the basic setup operations and use of the Intelligent Mail Device (IMD) handheld computer.

The IMD may use a variety of Motorola docking cradles for network communication and power charging. Note that this manual briefly describes the basic features of each cradle. For detailed installation and operation of each cradle, refer to the specific user manual of each cradle.

What is the IMD Handheld Computer

The IMD is a rugged handheld computer. The IMD is designed for field applications where fast mail data acquisition and exchange is required.

The IMD serves as a Personal Digital Assistant (PDA) that enables portable access to mobile applications, such as: mobile messaging, queries and Computer Aided Dispatch. It contains a built-in imager for barcode (1D and 2D labels) and signature capturing.

Wireless communication is through 802.11b Local Area Network (LAN, WiFi) and Bluetooth® connection to peripheral equipment.

The IMD display is a QVGA 3.5 inch transfective TFT. Equipped with a back-light, the display is designed to enable clear visibility under all light conditions.

A touch-screen enables easy access to on-screen menu navigation and signature capturing, using stylus or navigation keys. The screen is designed to withstand high impact.

The IMD is equipped with an ABC alpha-numeric keypad. The keypad back-light enables to operate the IMD in low-light conditions.

The operating system is WinCE.net®-based, running Windows® CE-based applications.
