

Astronomy 1 and 2 Galaxy Classification Activity

The Hubble “tuning fork” Sequence of galaxy classification. Galaxies are classified by shape. The **elliptical** galaxies go from circular (E0) to significantly flattened (E7). The spirals are sub-divided into **regular spirals** and **barred spirals**. Each of them is further sub-divided into groups depending on the size of the central bulge and how tightly the arms are wound around the center. The **irregular** galaxies have no definite structure. This is **not** an evolutionary sequence!

Galaxy Classification And Evolution Answer Key

Didier Musso

Galaxy Classification And Evolution Answer Key:

Galaxy Evolution Vladimir Avila-Reese,2003 Reports of the Seven Space Telescope Science Institute Working Groups on Key Projects for the Hubble Space Telescope Space Telescope Science Institute (U.S.),1985 *An Introduction to Galaxies and Cosmology* David John Adams,2004-05-31 This introductory textbook has been designed by a team of experts for elementary university courses in astronomy and astrophysics It starts with a detailed discussion of the structure and history of our own Galaxy the Milky Way and goes on to give a general introduction to normal and active galaxies including models for their formation and evolution The second part of the book provides an overview of the wide range of cosmological models and discusses the Big Bang and the expansion of the Universe Written in an accessible style that avoids complex mathematics and illustrated in colour throughout this book is suitable for self study and will appeal to amateur astronomers as well as undergraduate students It contains numerous helpful learning features such as boxed summaries student exercises with full solutions and a glossary of terms The book is also supported by a website hosting further teaching materials *Coevolution of Black Holes and Galaxies: Volume 1, Carnegie Observatories Astrophysics Series* Luis C. Ho,2004-09-09 This book was originally published in 2004 Black holes are among the most mysterious objects in the Universe Weighing up to several billion Suns massive black holes have long been suspected to be the central powerhouses of energetic phenomena such as quasars Advances in astronomy have not only provided spectacular proof of this long standing paradigm but have revealed the unexpected result that far from being rare exotic beasts they inhabit the center of virtually all large galaxies Candidate black holes have been identified in increasingly large numbers of galaxies both inactive and active to the point where statistical studies are possible Fresh work has highlighted the close connection between the formation growth and evolution of supermassive black holes and their host galaxies This volume contains the invited lectures from an international symposium that was held to explore this exciting theme and is a valuable review for professional astronomers and graduate students **Conducting Astronomy Education Research** Janelle M. Bailey,Timothy F. Slater,Stephanie J. Slater,2011-01-28 Tim Slater and Roger Freedman have worked to improve astronomy and overall science education for many years Now they've partnered to create a new textbook a re envisioning of the course focused on conceptual understanding and inquiry based learning Investigating Astronomy A Conceptual Approach to the Universe is a brief 15 chapter text that employs a variety of activities and experiences to encourage students to think like a scientist Astrophysics Update John Mason,2003-12-02 Written by leading exponents in the field this collection of timely reviews presents observational methods and the latest results of astronomical research as well as their theoretical foundations and interrelations providing information and scientifically rigorous coverage *Science with the Atacama Large Millimeter Array*: Rafael Bachiller,José Cernicharo Quintanilla,2008-04-03 Currently under construction in the Andean Altiplano Northern Chile the Atacama Large Millimeter Array ALMA is the most ambitious astronomy facility under construction ALMA

is a radio interferometer composed of 54 antennas of 12 m diameter and twelve 7 m antennas with about 6600 square meters of total collecting area Initially covering the most interesting spectral wavelength ranges from 3 to 0.3 mm ALMA will be a revolutionary telescope aimed to unveil the details of star and planet formation and to provide astronomy with the first exhaustive view of the dark and youngest objects of the Universe This book describes the enormous capabilities of ALMA the state of the project and most notably the scientific prospects with such a unique facility The book includes comprehensive reviews and recent results on most hot topics of modern Astronomy the formation and evolution of galaxies the physics and chemistry of the interstellar medium and the processes of star and planet formation with prospects to the revolutionary results to be obtained with ALMA These topics discussed with special emphasis on millimeter and sub millimeter astronomy are presented by some of the most world wide reputed scientists in their fields

The Evolution of Galaxies Through the Neutral Hydrogen Window Robert Minchin, Emmanuel Momjian, 2008-08-14 This conference brought together observers and theorists to discuss what we are learning from the current generation of extragalactic neutral hydrogen observations and what prospects lie ahead with particular emphasis on the exciting prospects for the next 3 to 10 years with the major U S facilities
