

[illegible]

Moving the Ignition Switch to the Start position provides current flow from the battery to the B terminal on the Solenoid Switch, through Fusible Link A to the BAT 2 and BAT 3 terminals of the Ignition Switch. Current flows through the Ignition Switch to the SOL terminal, through circuit 5 and/or 6 on "A" Cars and through circuit 6 on "B" Cars to the S terminal on the Solenoid Switch.

Current flows through the Pull-In and Hold-In Windings in the Solenoid Switch to magnetically engage the Drive Shifter. Pull-In Winding current also flows through the Starter Motor. The Solenoid Shift Lever moves the overrunning clutch down the spline shaft and moves the pinion into the ring gear. Contacts now close which rotates the armature.
