G Tech Question Paper Iab

Ingo Klein, Stefan Mitnik

G Tech Question Paper Iab:

Privacy in Statistical Databases Josep Domingo-Ferrer, Yücel Saygin, 2008-09-22 Privacy in statistical databases is a discipline whose purpose is to provide solutions to the tension between the increasing social political and economical demand of accurate information and the legal and ethical obligation to protect the privacy of the various parties involved. Those parties are the respondents the individuals and enterprises to which the database records refer the data owners those organizations spending money in data collection and the users the ones querying the database who would like their queries to stay confidential. Beyond law and ethics there are also practical reasons for data collecting agencies to invest in respondent privacy if individual respondents feel their privacy guaranteed they are likely to provide more accurate responses. Data owner privacy is primarily motivated by practical considerations if an enterprise collects data at its own expense it may wish to minimize leakage of those data to other enterprises even to those with whom joint data exploitation is planned. Finally user privacy results in increased user satisfaction even if it may curtail the ability of the database owner to profile users.

There are at least two traditions in statistical database privacy both of which started in the 1970s one stems from official statistics where the discipline is also known as statistical disclosure control SDC and the other originates from computer science and database technology. In official statistics the basic concern is respondent privacy.

Contributions to Modern Econometrics Ingo Klein, Stefan Mittnik, 2013-06-29 The field of econometrics has gone through remarkable changes during the last thirty five years. Widening its earlier focus on testing macroeconomic theories it has become a rather comprehensive discipline concerned with the development of statistical methods and their application to the whole spectrum of economic data. This development becomes apparent when looking at the biography of an econometrician whose illustrious research and teaching career started about thirty five years ago and who will retire very soon after his 65th birthday. This is Gerd Hansen professor of econometrics at the Christian Albrechts University at Kiel and to whom this volume with contributions from colleagues and students has been dedicated. He has shaped the econometric landscape in and beyond Germany throughout these thirty five years. At the end of the 1960s he developed one of the first econometric models for the German economy which adhered closely to the traditions put forth by the Cowles commission.
