organization of the note disclosures As a consequence each central bank following IFRS has largely developed its own disclosures with only limited reference to others Input from the external auditors has been significant but some of this has been determined by the approach used by the specific auditor s style for commercial banks rather than central banks Auditors do not always fully appreciate the differences between a commercial bank and a central bank which has a different role and undertakes transactions to meet its policy objectives This has often led to an over emphasis of items not material in the context of a central bank and insufficient disclosures on operations or accountabilities specific to the functions of the central bank
