Ecotheology Levente Hufnagel, 2023-01-11 *Ecotheology Sustainability and Religions of the World* gives a very interesting overview of the frontiers of scientific research in this important multi and transdisciplinary area. Its chapters use ecotheological approaches to discuss the multiple aspects of an environmental crisis from almost every segment of our planet. This book will be very useful for everyone: researchers, teachers, students or others interested in the field who would like to gain some insights into this aspect of our culture. *Textbooks and Educational Media: Perspectives from Subject Education* Péter Bagoly-Simó, Zuzana Sikorová, 2021-08-05 This book brings together empirical research and conceptual work on textbooks and education media from 13 countries and 17 disciplines. Along with textbook production, usage and development, it also explores the interconnectedness of educational policy and teaching and learning materials. Further, the book offers insights into regional and local discourses, e.g. specific theories of Portuguese and Spanish speaking countries as well as Nordic countries, contrasting their theories with international literature practices and solutions with regard to teaching selected subjects at the pre-primary, primary, secondary and tertiary level. This book also discusses the specific combinations of subjects, e.g. Physics, Biology, Geography, Swedish, English and their subject specific education, e.g. Physics Education or Didactics. Lastly, it examines the work of a number of early career researchers, giving them a voice and bringing in fresh ideas currently being developed in various countries around the globe. This proceedings volume will appeal to publishers, subject educators in primary, secondary and tertiary education and academic researchers from the fields of textbooks, educational media and subject specific education. Its international authorship and explicit focus on subject specific particularities of educational media provide a unique and comprehensive overview. *Civics and Citizenship Education in Australia* Andrew Peterson, Libby Tudball, 2016-11-17 *Civics and Citizenship Education in Australia* provides a comprehensive analysis of teaching and learning in this field in Australian schools, drawing on case study material to demonstrate the current practice in the field. Reflecting on the issues and possibilities raised by the inclusion of civics and citizenship education in the new national Australian curriculum, leading national and international scholars analyse the subject's theoretical, curricular and pedagogical bases and approaches. Placing civics and citizenship education within historical and contemporary contexts, the book critically explores a range of issues concerning the development, organisation and teaching of the subject. These include how the subject might include indigenous, global and Asian perspectives and how it may help students to engage with issues around sustainability, active citizenship, diversity, religion and values. The final chapters, written by scholars from England, the USA, Canada, Hong Kong and Singapore, adopt a comparative approach, situating Australian civics and citizenship education in the wider international context. **The SAGE Handbook of Curriculum, Pedagogy and Assessment** Dominic Wyse, Louise Hayward, Jessica Pandya, 2015-12-03 The research and debates surrounding curriculum, pedagogy and assessment are ever growing and are of constant importance around the globe.
