Limpopo June Exam Papers 2014:

Dominance and Decline Susan Booysen,2015-10-01 As Jacob Zuma moves into the twilight years of his presidencies of both the African National Congress ANC and of South Africa this book takes stock of the Zuma led administration and its impact on the ANC Dominance and Decline The ANC in the Time of Zuma combines hard hitting arguments with astute analysis Susan Booysen shows how the ANC has become centred on the personage of Zuma and that its defence of his extremely flawed leadership undermines the party s capacity to govern competently and to protect its long term future Following on from her first book The African National Congress and the Regeneration of Power 2011 Booysen delves deeper into the four faces of power that characterise the ANC Her principal argument is that the state is failing as the president s interests increasingly supersede those of party and state Organisationally the ANC has become a hegemon riven by factions as the internal blocs battle for core positions of power and control Meanwhile the Zuma controlled ANC has witnessed the implosion of the tripartite alliance and decimation of its youth women s and veterans leagues Electorally the leading party has been ceding ground to increasingly assertive opposition parties And on the policy front it is faltering through poor implementation and a regurgitation of old ideas As Zuma s replacements start competing and succession politics take shape Booysen considers whether the ANC will recover from the damage wrought under Zuma s reign and attain its former glory Ultimately she believes that while the damage is irrevocable the electorate may still reward the ANC for transcending the Zuma years This is a must have reference book on the development of the modern ANC With rigour and incisiveness Booysen offers scholars and researchers a coherent framework for considering future patterns in the ANC and its hold on political power

Systems Analysis Approach for Complex Global Challenges Priscilla Mensah,David Katerere,Sepo Hachigonta,Andreas Roodt,2018-04-09 This book which contains a collection of review articles as well as focus on evidence based policy making will serve as a valuable resource not just for all postgraduate students conducting research using systems analysis thinking but also for policy makers To our knowledge a book of this nature which also has a strong African focus is currently not available The book examines environmental and socio economic risks with the aim of providing an analytical foundation for the management and governance of natural resources disasters addressing climate change and easing the technological and ecological transitions to sustainability It provides scientific and strategic analysis to better understand the dynamics of future energy transitions their main driving forces enabling factors barriers as well as their consequences for the social economic and environmental dimensions of human wellbeing Science based policy advice is achieved through an integrated assessment and modeling of how to simultaneously address the major energy policy challenges in the areas of environment climate change and air pollution energy poverty or access to affordable and clean energy for the poor energy security and reliability It also aims to improve our understanding of ecosystems and their management in today s changing world in particular the current state of ecosystems and their ecological thresholds and

buffering capacities It provides support for policy makers in developing rational realistic and science based regional national and global strategies for the production of fuel food and fibre that sustain ecosystem services and safeguard food security Finally it addresses the human development dimension of global change based on comprehensive studies on the changing size and composition of human populations around the world by analyzing both their impacts and the differential vulnerabilities by age gender and level of education

Land, the State and the Unfinished Decolonisation Project in

Africa Chitonge, Horman,Mine, Yoichi,2019-06-25 This book focuses on the work of one of the leading African scholars on the land question and agrarian transformation in Africa Sam Moyo It offers a critical discussion in conversation with Sam Moyo of the land question and the response of African states Since independence African states have been trying to address the colonial legacy on land policy and governance After six decades of formulating and implementing land reforms most countries have not succeeded in decolonising approaches to land policy and the administrative framework The book brings together the broader debates on the implications of decolonisation of Africa s land policy Through case studies from several African countries the book offers an empirical analysis on land reforms and the emerging land relations and how these affect land allocation and use including agricultural production Most of the chapters discuss how the unresolved land question in post colonial Africa impacts on agricultural production and rural development broadly The failure to decolonise colonial land policy and the imported tenure systems has left post colonial African states dancing to two tunes resulting in schizophrenic land and agrarian policies The book demonstrates that the failure by African states to reconcile imported and indigenous land tenure systems and practices is evident in the deliberate denigration of customary tenure It is also evident in the rising land inequality and the neglect of the agricultural sector the small scale and subsistence sub sectors in particular

The Promise of New Technologies in an Age of New Health Challenges A.J. Maeder,K. Ho,A. Marcelo,2016-11-24 There is a changed emphasis in many health services with conventional pressures such as budget and workforce constraints combined with the indirect forces of social change and strategic direction bringing about the need for more flexible approaches for the longer term By enabling different care models and delivery channels telehealth offers demonstrably effective and sustainable solutions for issues such as access to and quality of care This book presents 18 papers delivered at the 5th Global Telehealth Conference held in Auckland New Zealand in November 2016 The theme chosen for Global Telehealth 2016 is The Promise of New Technologies in an Age of New Health Challenges and the papers included here cover a wide variety of topics from theoretical and abstract contributions through to discussions of practical projects and highly specific applied contributions The book also includes two invited papers which detail recent contributions to two global issues in which telehealth plays a major role universal health coverage and personal health monitoring With papers ranging in scope from computer assisted screening technology for diabetic retinopathy to behavior change through computer games this book will be of interest to all those involved in the design and provision of healthcare services

Illicit Financial Flows from South Africa Serges

Djoyou Kamga,2021-09-21 This book examines the detrimental impact of illicit financial flows on South Africa's development political economy and transformation in the 21st century. Over the years illicit financial flows have led to the systematic looting and channelling away of South African resources yet they are rarely studied by researchers looking to explain the country's underdevelopment and political economy. This book looks across sectors showing that illicit financial flows cut across all the key pillars of development frustrating the betterment of people's lives in South Africa. Investigating the problem from a decolonial perspective the book delves deep into the catastrophic impacts of illicit financial flows for people and the economy. It discusses how the problem is being combatted and ultimately suggests solutions for rebuilding social trust between people and the state. Making an important contribution to the decolonial debate as well as to discussions of South Africa's political economy this book will be of interest to researchers across African studies global development political science law and corruption studies

The African Food Environments Amos Laar, Kaleab Baye, Anna Lartey, Francis Zotor, Gershim Asiki, 2023-09-05 In many respects the continent of Africa is in transition. Prominent among them currently is the nutrition transition. One consequence of the nutrition transition is the increase in prevalence of nutrition related non-communicable diseases (NCDs) such as obesity, type 2 diabetes, cardiovascular diseases and certain cancers. Although NCDs are a global public health problem the rate of increase in NCDs' morbidity and mortality in some African countries is staggering. This surge has been linked to modifiable environmental factors factors that facilitate the consumption of obesogenic energy dense nutrient poor foods rather than unrefined cereals, fruits and vegetables. It has long been recognized that the physical and social environments in which people live, work and eat are critical determinants of their health. More recently there has been a greater focus on the food environment as a key determinant of health. Available evidence shows that unhealthy food environments drive unhealthy diets and unhealthy diet is one of four main risk factors for NCDs

Daphna-Tekoah, 2023-01-04 *Measuring Transboundary Water Cooperation* Saruchera, D., Lautze, Jonathan, 2015-12-31 Water cooperation has received prominent focus in the post 2015 United Nations Sustainable Development Goals (SDGs). While proposals for measuring water cooperation appear to be converging toward a small set of indicators the degree to which these proposed indicators draw on past work is unclear. This paper mines relevant past work to generate guidance for monitoring the proposed SDG target related to transboundary water cooperation. Potential measures of water cooperation were identified, filtered and applied in three countries: Botswana, South Africa and Zimbabwe. Six indicators were ultimately determined as being suitable for measuring water cooperation. As the SDG process turns its focus to the selection of indicators the indicators proposed in this paper may merit consideration

Enhancing Food Production System Resilience for Food Security Facing a Changing Environment Liming Ye, Ping Zhu, 2023-11-28 As the dominant source

of the human food supply the global land system underlies the foundation of the livelihood and wellbeing of humanity on Earth On the one hand the growth rate in the land system s productive capacity of food has played a key role in global food provision Technological breakthroughs in wheat and rice production during the past few decades for instance have greatly contributed to the maintenance of this growth rate in many parts of the world On the other hand however the terrestrial food production system is facing increasing challenges from environmental stressors ranging from climate change air pollution to land degradation Whether and how the global land system will support the food security of more than 10 billion people in the 21st century while minimizing its environmental footprint remains an open question to debate It is inevitable that the global food production system has to be shifted from focusing on production expansion to land system resilience so that the dual goals of sustainable production and environmental friendliness can be simultaneously achieved
