Mortimer, 2020-07-09 This memoir summarizes the current knowledge of New Caledonia's geology, geodynamic evolution and mineral resources based on published and unpublished information. It comprises 10 research papers each addressing a particular geological assemblage or topic. After an introductory chapter and a review of the published geodynamic models of evolution of the SW Pacific, chapters 3 to 5 focus on the main geological assemblages of Grande Terre: the Pre-Late Cretaceous basement terranes, the Late Cretaceous to Eocene cover and the Eocene subduction-obduction complex, one of the largest and best preserved in the world. Chapter 6 is devoted to the Loyalty Islands and Ridge. Chapter 7 deals with the mostly terrestrial post-obduction units including regolith. Chapter 8 deals with palaeobiogeography and discusses plausible scenarios of biotic evolution. Chapters 9 and 10 provide a comprehensive review of New Caledonia's mineral resources. The volume will interest stratigraphers, sedimentologists, marine geologists, palaeontologists, palaeogeographers, igneous and metamorphic petrologists, geochemists, geochronologists and specialists in tectonics, geodynamic evolution, regolith, ophiolites and economic geology. The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces, 1893 The role of parent-child interactions in developmental psychopathology: methodological and intervention challenges and opportunities Rebecca Pearson, Tamsen Jean Rochat, Bronwyn Coetzee, 2025-03-06 Parenting research has always faced substantial methodological challenges, assumptions and stigma limiting understanding and translation to more family-centred support. In addition, the focus of most research has focused on the early years with far less knowledge about the role of parents in pre-adolescence, adolescence and the transition to adulthood or beyond. Parenting work lacks diversity with regards to inclusion across cultural settings and is usually limited to mothers; the role of fathers, grandparents, adoptive and foster parents and step-parents is under-represented. Current advancements in technology and data science, as well as cross-cohort collaboration enabling pooling of observed parent-offspring interaction in larger numbers, provides opportunities to bring together new understanding. In addition, enabling the voice of diverse parents with lived experience throughout the research process will enhance the meaning and interpretation of findings. *Essentials of Communication Sciences & Disorders* Fogle, 2017-10-20 Fully revised and updated *Essentials of Communication Sciences and Disorders* Second Edition is an accessible and engaging introductory resource for students new to communication sciences and disorders.
